

SKILLS THAT WILL TAKE YOU PLACES!

Interested in improving your Genetics lab skills by teaching others? We're looking for eager and qualified undergraduates to serve as "CompLab" (BIOL 2302) instructors! Please note:

- CompLab is taught in-person, meeting weekly for an hour and forty minutes in a classroom.
- Teaching a section requires 10 - 12 hours/week, divided among prep time, instruction time, grading, office hours, and communicating with students and other instructors.
- The going rate per section is approximately \$2000.
- This is a great way to improve your own understanding of genetics while also gaining soft skills, juicing up your resumé, growing your confidence, and increasing your odds of landing an awesome co-op position.

Qualifications:

- You have taken CompLab, earned an A, and found yourself wanting more;
- You'll be on campus and available to teach (specific time, specific place);
- You are willing and available to participate in an ongoing email chain among instructors to answer one another's questions and concerns;
- You are eager to take on the challenge of figuring out how best to explain complex concepts to others;
- You are self-motivated and resourceful;
- You are willing to share your ideas on improving various aspects of the course material;
- You are excited about the opportunities that will open to you when you have these skills!

What to do next?

If you are interested in taking on a section (in-person) of CompLab in an upcoming semester, please send the following information to Prof. Henzy:

1. Your résumé
2. A brief statement (just a few sentences) describing why you want to teach this course

Thanks for your interest!
